

SHREYASH DANDEKAR

Backend Developer (Python | Node.js | FastAPI)

Email: shreyashd429@gmail.com | Phone: +91 7498539668

Mumbai, Maharashtra, India

LinkedIn: linkedin.com/in/shreyash-dandekar-19387a321 | GitHub: github.com/Shreyash1106

PROFILE

Backend Developer with close to two years of hands-on experience delivering live client products in healthcare and business-automation domains, using Python, FastAPI, Node.js, and Fastify. Has built and shipped REST APIs and PostgreSQL-backed systems for a hospital management platform and a business-automation platform, and independently architected a full-stack attendance & leave management system end to end. Comfortable owning a feature from database schema to deployment (Docker, AWS, Render), and collaborating closely with frontend teams and senior engineers to ship on schedule. Currently pursuing BCA from University of Mysore. Looking to bring this hands-on, ownership-driven approach to a full-time Backend Developer role.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Backend: FastAPI, Node.js, Fastify, REST API Design

Databases: PostgreSQL, MySQL, SQLite

DevOps & Cloud: Docker (containerization basics), AWS (basics), Render (deployment)

Version Control: Git & GitHub — branching, pull requests, team collaboration on shared repos

Tools: Postman, GitLab

Data Analytics: Pandas, NumPy, Matplotlib, Seaborn, EDA

Core Concepts: Authentication & Authorization, API Design, Database Schema Design, Session Management, Manual/Functional Testing

WORK EXPERIENCE

Backend Developer Intern — Baap Company

Aug 2024 – Present

- Engineer backend applications in Python (FastAPI) and Node.js (Fastify) that power live client products, turning requirements directly into shipped features.
- Design and deliver REST APIs that let frontend teams integrate quickly, cutting back-and-forth between frontend and backend.
- Own schema design and query writing in PostgreSQL and MySQL, keeping client data accurate, well-structured, and fast to retrieve.
- Build authentication and authorization systems that secure client applications and protect user data.
- Partner with frontend developers using Git/GitHub (feature branches, pull requests) and drive testing/bug-fixing to ship stable releases on schedule.
- Deploy and validate applications using Docker and cloud platforms (AWS, Render), taking features from local development to live environments.

KEY PROJECTS

Sangamner AI — Local City Marketplace Platform (Client Project, currently on hold)

Tech Stack: Node.js, Fastify, PostgreSQL

- Engineered the backend for a city-based local marketplace platform that let Sangamner city shops and apartments list and sell online, functioning as a local online marketplace for the area.
- Built REST APIs using Fastify/Node.js and designed the PostgreSQL schema for multi-vendor listings; implemented authentication and authorization so different user roles could work securely from day one.

SJS Hospital Management System (Client Project)

Tech Stack: Node.js, Fastify, PostgreSQL

- Delivered backend modules covering Patient Registration, Appointment Scheduling, Doctor Management, Nurse Scheduling, and Ambulance Coordination, with role-based access control for each staff type.
- Designed the PostgreSQL schema and built the REST APIs powering frontend integration, keeping hospital records organized and quick to retrieve for staff.

Attendance & Leave Management System (Independent Full-Stack Project)

Tech Stack: React, Node.js, PostgreSQL

- Independently architected and built a full-stack college attendance and leave management app from the ground up — login/logout timestamps automatically mark daily attendance.
- Designed the PostgreSQL schema and built the REST APIs powering a role-based request/approval/rejection workflow for leave applications, consumed by a React frontend.

CERTIFICATIONS

- SQL and Relational Databases — IBM
- Node.js Intermediate — HackerRank
- Python Basic & SQL Basic — HackerRank
- Python Basics — Udemy

ACHIEVEMENTS

- Ranked Top 15 at BAAP Ideathon 2025 (Baap Company) for the project “Medical AI + HR Management”, recognized for creativity, innovation, and problem-solving.

EDUCATION

Bachelor of Computer Applications (BCA) — Pursuing (External Mode)

University of Mysore

SOFT SKILLS

Communication, Team Collaboration, Problem Solving, Analytical Thinking, Adaptability, Continuous Learning, Time Management
